## Science for all.

# Who we are.

We are a group of student scientists committed to making the life sciences accessible to all.

As biology is becoming increasingly relevant, it is imperative that everyone is invited and heard.

We take pride in our shared vision and values, as well as our commitment to equity and workplace democracy.

# What we do.

We provide free and comprehensive resources to promote interest and knowledge in biology. Here are some of our current projects.

## Biology Course

Designed for high school and college students, this course will take you through each facet of the

## Local Groups

Emphasizing the power of group learning and teamwork, members of local chapters perform and learn

## Live Test Prep

Resources for standardized exams, including AF  Made in Webflow and Biology Olympia are available

intriguing world of life through inspiring articles and videos.

Coming soon!

from numerous physical and virtual experiments.

Create a chapter

through livestreams. **2020-2021 ONLY!**
